

Panel 1

$$p = 2, \quad k = 1$$

Feasible region: $0 \leq \beta_i \leq 1, \sum_i \beta_i \leq k$. Red dots: a maximizing vertex.

$$\lambda_1 \geq \dots \geq \lambda_p \geq 0, \quad \max \sum_i \lambda_i \beta_i = \sum_{i=1}^k \lambda_i$$

$$p = 3, \quad k = 2$$

Panel 2

$$B = V^T S, \quad B^T B = I_k$$

$$\beta_i = \|b_i\|^2 \geq 0, \quad \sum_i \beta_i = k$$

Panel 3

$$\widetilde{B} = [B \ B_\perp], \quad \widetilde{B}\widetilde{B}^T = I_p$$

$$\|b_i\|^2 + \|b_i^\perp\|^2 = 1 \quad \Rightarrow \quad \beta_i \leq 1$$
