Wavelets, NL	$M^{-2\alpha}$	$M^{-2\alpha}$	$M^{-\alpha}$	M^{-1}	M^{-1}

Cartoon images: adaptive triangulations $O(M^{-2})$; curvelets $O(M^{-2}(\log M)^3)$.

L: linear; NL: nonlinear. Here $\alpha \geq 1$; bases satisfy the chapter's assumptions.

The BV class also has the uniform bound assumed in the chapter.
