Mathematical Foundations of Data Sciences

Figure Review Complete

Gabriel Peyré

CNRS & DMA, École Normale Supérieure

September 9, 2026

All 145 accepted reconstructions are now included in the main book and its independent chapters. There are no pending figure comparisons.

The original cover and the illustrations explicitly retained by the author remain unchanged. The previous comparison volume and its figure index are preserved in `archive/2026-09-06-reviewed-figures/`.

The complete decision ledger and editable figure sources retain the original audit identifiers and current book numbering.
